The proof above shows the exact hierarchy: the white question remains high on the chest, with clear breathing room before the larger warm-gold URL block. The tapered rules beside .com match the approved secondary logo.

## Production Specifications

|                     |                                                                                                    |
|---------------------|----------------------------------------------------------------------------------------------------|
| <b>Garment</b>      | High-quality black ringspun-cotton crew-neck shirt; Bella+Canvas 3001 or comparable.               |
| <b>Placement</b>    | Centered front chest. Front-only is recommended; the identical design may be repeated on the back. |
| <b>Adult width</b>  | 11.5 to 12 inches maximum; scale proportionally for youth and smaller garments.                    |
| <b>Artwork</b>      | Use the supplied transparent PNG, outlined SVG, or vector PDF. Do not recreate the design.         |
| <b>White</b>        | #FFFFFF                                                                                            |
| <b>Warm gold</b>    | #F3CB7D - flat printed ink, not metallic foil, glitter, or reflective ink.                         |
| <b>Underbase</b>    | Use a white underbase when required to keep both colors opaque on the black garment.               |
| <b>Print method</b> | Direct-to-garment for small quantities; screen printing may be economical for bulk orders.         |

## Printer Approval Checklist

- Confirm every word, the question mark, the leading period in .com, the closed-up URL words WeProve and TheBible, and all capitalization.
- Confirm the top question is white and the complete URL block is warm gold.
- Confirm the thin gold rules beside .com are short, tapered, and identical to the approved secondary logo.
- Confirm the artwork is centered and has not been cropped, stretched, rewritten, recolored, or rearranged.
- Approve a digital proof, then order and inspect one physical sample before a larger quantity.

## How to Order

### ***1. Choose a printer***

Use a trusted local garment printer, Custom Ink, or RushOrderTees. Compare garment quality, final price, turnaround time, and proofing service.

### ***2. Send the complete package***

Do not send only a screenshot. Send the ZIP file so the printer receives the scalable artwork, transparent PNG, proof, mockup, and these specifications.

### ***3. Give one clear instruction***

Say: Please reproduce this shirt exactly as shown in the approved mockup and proof. Keep the wording, colors, spacing, tapered rules, and layout unchanged, and send me a digital proof before production.

### ***4. Review the proof***

Check every word, color, line, spacing relationship, and the complete website address before approving production.

### ***5. Order one sample***

Inspect one physical shirt before ordering a larger quantity.
